Dear valued customer,

We are pleased to announce that RECIF Technologies is now part of the Accuron Technologies group of companies and that we will continue to operate as RECIF Technologies.

Accuron Technologies is a global precision engineering and technology group headquartered in Singapore. Founded in 1981, it is a Temasek-owned international group with core competencies in precision manufacturing, systems design, and system integration, with established operations in major markets across Asia, Europe, and the USA.

We decided to join Accuron as they share similar values as we do in investing in long-term value-creating relationships with our partners and customers. We look forward to discussing any opportunities to enhance our partnership with you in due course.

Please note our intent to maintain our current good working approach

- all RECIF's people are being retained in their current roles
- you will continue to work with the same people in our company
- there will be no changes in RECIF's offices and the existing phone numbers/e-mails

If you have any questions about this exciting news and what it will mean for you, please contact me or your preferred RECIF contact at any time. We look forward to introducing you to some of our new partners and associates when the opportunity arises.

We are very grateful to you for your loyalty and trust over the years, which have enriched this partnership with RECIF. We are confident that our new affiliation will serve us all well, and we look forward to your continued support.

Warmest Regards,

Laurent SALANQUEDA
CEO
